DRYDOCK INSPECTION AND UNDERWATER SURVEY BOOK

Name of Vessel	
Official Number	Class
Date Completed	
Location	
Vessel Built in Compliance with	SOLAS: 60 74 74/78 N/A
Inspection Type	
Drydock Inspection	Underwater Survey in Lieu of Drydock (UWILD)
Internal Structural Examination (ISE)	Cargo Tank Internal Examination (CTIE)
Inspectors	
1	3
2	4

Total Time Spent Per Activity:

Regular Personnel (Active Duty)						
ACTIVITY TYPE ACTIVITY TRAINING (PERS) MI						

TOTAL ADMIN HOURS	TOTAL TRAVEL HOURS

Reserve Personnel					
ACTIVITY TYPE ACTIVITY TRAINING (PERS) MI					

TOTAL ADMIN HOURS	TOTAL TRAVEL HOURS

Auxiliary Resources		
TOTAL BOAT HOURS	TOTAL AIRCRAFT HOURS	

Use of Drydock Inspection Book:

This inspection book is intended to be used as a job aid by Coast Guard marine inspectors during drydock inspections, underwater surveys in lieu of drydock inspections, internal structural examinations, and cargo tank internal examinations of U.S. flagged vessels. The lists contained within this book are not intended to limit the inspection. Each marine inspector should determine the depth of inspection necessary. A checked box should be a running record of what has been inspected. It does not imply that the entire system has been inspected or that all or any items are in full compliance. This job aid does not constitute part of the official inspection record.

This document does not establish or change Federal laws or regulations. References given are only general guides. Refer to IMO publications, CFR's, NVIC's or any locally produced cite guides for specific regulatory references. Not all items in this book are applicable to all vessels.

NOTE: Guidance on how to conduct drydock inspections, internal structural examinations, and cargo tank internal examinations of U.S. flagged vessels can be found in the Marine Safety Manual (MSM) Volume II, Chapter B3: Hull Examinations. Guidance on underwater surveys in lieu of drydock inspections can be found in NVIC 1-89. All MSM cites listed refer to MSM Volume II unless otherwise indicated.

Pre-inspection Items:

- Post-inspection Items:
- Review MSIS records.
 - MIPIP
 - MICOI

- Complete MSIS entries.
 - MIAR
 - MSDS
 - MIDR
 - VFLD
 - VFEI
- Initiate Report of Violation (ROV) if necessary.

Note:	S:

Special Criteria for Passenger Vessels: NOTE: Passenger vessels may request drydock extensions up to 30 months in some cases, which will require an underwater examination of the hull. Guidance for this process is found in MSM Ch. B3.A.4.d. WARNING: ALL passengers must be removed from vessel prior to removal of sea valves. Hull Maintenance and Condition Assessment Program Preventative maintenance plan Annual hull condition assessment Site selection Sufficient water depth Underwater hazards "Clear box" Preliminary examination Third party

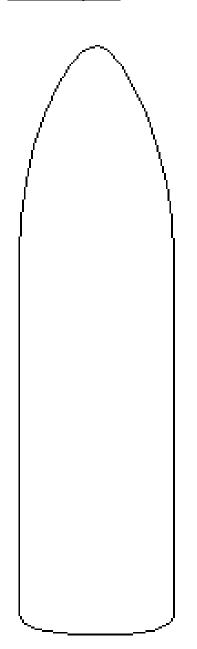

Divers

Notes:	 	 	

Section 4: Appendices

Vessel Layout:

- Double hull / bottom / sides
- Ballast tanks
- Chemical tank type: I II III
- Deck tanks
- Deckhouse location
- Deck cranes
- External / internal framing
- Layout of pumps type
- Tank material construction
- Cargoes carried

Recommended US Vessel Deficiency Procedures:

Step	Action				
1	Identify deficiency.				
2	Inform vessel representative.				
3	Record on the <i>Deficiency Summary Worksheet</i> (next page).				
4	If deficiency is corrected prior to end of inspection, go to Step 7.				
5	If deficiency is unable to be corrected prior to end of inspection issue CG-835 in accordance with table below.				
	IF deficiency:	THEN issue CG-835:			
	Does NOT immediately impact crew/passenger safety, hull seaworthiness, or the environment, e.g.,	That provides a specific time for correcting deficiency, e.g., • "X" number of days			
	Underwater survey video not immediately available				
	Allows vessel operations to be MODIFIED to meet less stringent requirements, e.g.,	That restricts operation of vessel to meet current vessel conditions, e.g.,			
	Deteriorated PV valves	Carriage restricted to Class E cargoes			
	DOES immediately impact crew/passenger safety, hull seaworthiness, or the environment, and cannot be modified to meet less stringent requirements, e.g., • Structural defect or damage	That requires the deficiency to be corrected prior to operating vessel ("NO SAIL" item), e.g., • Prior to carrying passengers			
6	Enter CG-835 data in MIDR.				
7	Enter deficiency data in MSDS.				
8	Initiate a Report of Violation (RO	V) if necessary.			

Deficiency Summary Worksheet:

Name of Vessel	VIN	
Deficiency	MSIS Code	Req't. Issued / Date Completed

Deficiency	MSIS Code	Req't. Issued / Date Completed

Deficiencies identified should be listed with MSIS codes. At completion of inspection/examination, any outstanding deficiencies shall be entered in MIDR or PSDR as appropriate. All deficiencies found (outstanding and completed) shall be entered in the Deficiency Summary. Worklist items, which serve only as memory joggers to complete inspection/examination (e.g., test emergency fire pump), should not be coded as deficiencies.

MSIS Codes for Deficiencies:
